[Run Linux App On MacOS](#)

Backlash is a relatively new Linux-based operating system created for 64-bit processors in 2016.

1. [linux macos theme](#)
2. [linux macos vm](#)
3. [linux macos big sur](#)

It can be run as live media from a USB or CD with some of its distinguishing features being its macOS GUI aesthetic, HTTPS Everywhere browser extension enabled on by default, and its automatically set engine to DuckDuckGo.
